

ABOUT AP CONTENT API

The AP Content API allows you to search and download AP Images content using your own editorial tools, without having to visit the AP Images website.

AP Images

With millions of images dating back more than 100 years, AP Images is one of the world's largest collections of historical and contemporary imagery. The AP Images collection is constantly updated and includes entertainment, fashion, news and sports coverage from The Associated Press and a variety of content partners.

ACCESS THE API

Work with your own editorial system. Your editors search and download AP Images content using your own editorial tools:

- ① **Run a search.** When an editor performs a search in your editorial system, your custom program searches the AP Images collection and displays search results along with key metadata.
- ② **Pick a particular result.** When an editor selects a search result, your custom program retrieves full content metadata from the AP Content API system.
- ③ **Download an image.** When an editor wants to download a particular image, your custom program downloads the requested content file from the AP Content API system.

For more information, refer to the *AP Content API Developer's Guide* at <http://developer.ap.org>.
